

CleanFlow

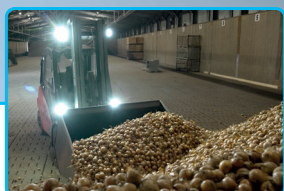

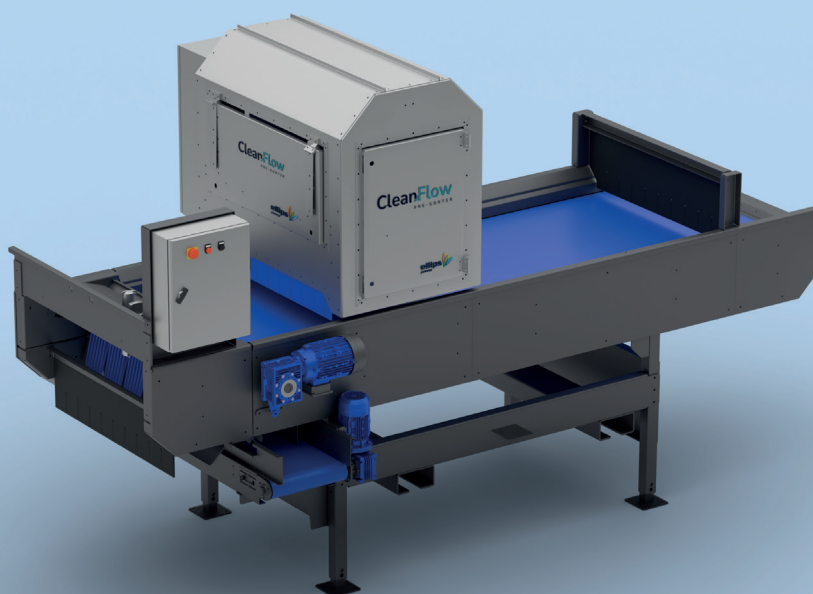

PRE-SORTER

The first line of defence for **your grading process.**

What are stones and clods costing your operations?

The CleanFlow Pre-Sorter protects your storage, your grader and your profitability by removing stones, clods, extreme defects, foreign objects and debris before they enter your process. Positioned at the start of your intake or grading line, it helps protect your entire operation by delivering a cleaner batch for storage, reducing equipment wear and maximizing grading performance.

Keep your storage
clean

Protect your grader

Reduce manual labor

Maximize grading
performance

Why choose the CleanFlow Pre-Sorter?

- ✓ Prevent unnecessary machine wear and costly breakdowns
- ✓ Reduce manual pre-sorting and operator intervention
- ✓ Keep your grading line running at maximum capacity
- ✓ Protect your storage from stones, clods and foreign objects
- ✓ Create a calmer, more stable product flow
- ✓ Increase grading accuracy by removing problems early

Protect your grading line before problems enter your process. Scan the QR for more info.

Cleaner product. Better grading.
