

End Rodded Chain Headaches with Abrasion Resistant Belting in Destoner/Rock Trap and Washer

Eliminate unscheduled downtime and 90% of maintenance costs on your potato washers and destoners/rock traps by retrofitting rodded chains to Intralox® Series 1750 belting.

S1750 Belting

Reliable and predictable, S1750 is designed for heavily loaded, abrasive applications in the harshest conditions. Instead of handling heavy steel rodded chains, our modular plastic belt is lightweight and easy to work with. Retrofitting to Intralox technology pays for itself in 1 year or less and lets you eliminate rodded chains forever.

Features and Benefits

FDA-approved material and patented rod design

- Supports abrasive, heavy-duty, high-load applications
- Lasts 2.5–3 times longer than rodded chain belts
- Minimizes belt wear and elongation

Modular design

- Eases installation, maintenance, and repairs without heavy equipment
- Allows quick, easy retrofits
- Maximizes reliability with predictable belt life

Positive drive

- Simplifies conveyor design with few moving parts
- Moves heavy loads without slippage and mistracking
- Minimizes unscheduled downtime

Open area

- Optimizes drainage, water flow, and pump performance
- Reduces water consumption
- Eliminates risk of product loss and improves throughput

Intralox services and support

- Experience the industry's shortest lead times
- Get support from Intralox experts
- Contact us for conversion kits
