

CONNECT YOUR BELTS IN MINUTES—NOT HOURS— WITH INTRALOX ZEROSPLICE TECHNOLOGY

Benefits

- **Eliminates the need to rely on third parties for splicing services**
- **Introduces modularity to thermoplastic, positive-drive belting**
- **Ensures fast, easy, DIY installation**
- **Enables plant personnel to quickly disassemble and reassemble belts**
- **Reduces emergency downtime significantly**
- **Facilitates easier belt handling on incline and elevated conveyors**

Forget the headaches of belt splicing. Intralox® ZeroSplice™ technology enables food processors to connect sections of ThermoDrive® belting quickly and easily without field splicing.

ZeroSplice technology utilizes our fully enclosed ThermoLace™ Heavy-Duty Edge, and can be ordered in all available drive styles, fabrication styles, surface profiles, and accessories.

Why wait? Try ZeroSplice technology—available exclusively from Intralox—for fast, easy, DIY connectivity.

And never splice your belts again.
