## POTATO COMMODITIES

### Summary

This statistical report focuses on the United States exports of Potato Commodities to the world. The data was sourced from the United States Department of Commerce, Foreign Trade Division, using the Harmonised Coding System, Schedule B. The commodities used in this report are listed below along with their definitions.

Note: Fresh potato exports include table-stock, chip-stock, and other potatoes destined for processing. Also, any seed export figures to Malaysia, the Philippines, and Mexico have been converted to fresh exports instead. Most of the seed exports to Taiwan in 2017 have been converted to fresh exports.

The **Fresh Weight Equivalents** in this report were calculated using the following multipliers:

Frozen French Fries/Potatoes: 1.7; Dehydrated Potatoes: 6.5; Potato Chips: 4
